

**FOR IMMEDIATE RELEASE**

***U.S. Embassy in the Philippines and GLSS Host  
“Transform Tomorrow Together: Ethical Efficiency™ for the Philippines”***

***Groundbreaking forum unites ethics, innovation, and sustainable development***

(Manila, Philippines) — The U.S. Embassy in the Philippines, in partnership with [GLSS](#), successfully hosted *Transform Tomorrow Together: Ethical Efficiency™ for the Philippines* on **October 15, 2025**, at The Peninsula Manila. This exclusive forum introduced a groundbreaking framework that unites innovation, ethics, and measurable results to empower sustainable progress across sectors.

The event brought together distinguished leaders from government, education, and industry, including Undersecretaries from the Department of Agriculture, multiple Directors from the Civil Service Commission, leaders from the Department of National Defense, representatives from the Quezon City Local Government, the President of De La Salle University, and the Head of Learning & Leadership from Century Pacific Food Inc., and many more. Their participation underscored the growing national momentum to embed integrity and efficiency at the heart of Philippine development.

The forum featured keynote insights from **Karlo Tanjuakio**, Founder & Chairman of GLSS, a Filipino-American entrepreneur recognized globally for transforming how organizations learn, lead, and perform. Under his leadership, GLSS has partnered with Fortune 500 companies, the U.S. Government, and over 3,000 universities to deliver measurable, ethical, and scalable impact. During his address, Tanjuakio shared his vision of bringing these proven practices home

to the Philippines—empowering leaders in education, government, and industry to drive inclusive and principled growth.

A highlight of the event was the introduction of **Ethical Efficiency™**, a modern performance framework developed by GLSS that is transforming systems worldwide by integrating technology, project-based learning, and global best practices with a foundation of integrity and accountability. The discussions explored how this model helps students gain real-world skills, strengthens competitiveness across industries and agriculture sectors, builds resilience in defense and security teams, and fosters trust and accountability in government and community institutions.

More than an efficiency model, **Ethical Efficiency™** represents a new standard that balances innovation with values. It drives responsible innovation that uplifts communities, and strengthens trust, fosters continuous learning through real-world projects that turn theory into measurable results, and cultivates ethical leadership that delivers sustainable prosperity and resilience.

By embedding ethics into operational excellence, Ethical Efficiency™ helps build organizations and systems that are not only high-performing but also principled and enduring—delivering long-term benefits for people, institutions, and the nation.

Already trusted in the United States by Fortune 500 companies, the U.S. Government, and over 3,000 universities, **GLSS's Ethical Efficiency™** is now being introduced exclusively in ASEAN through the Philippines—positioning the nation as a regional leader in responsible innovation and sustainable growth.

## About GLSS

GLSS is a global enterprise learning platform founded by Filipino-American Karlo Tanjuakio. The company partners with leading organizations worldwide to advance efficiency, leadership, and accountability through its proprietary **Ethical Efficiency™** framework. By integrating technology, project-based learning, and measurable outcomes, GLSS empowers businesses, governments, and educational institutions to achieve sustainable, values-driven impact.
